crfdic	1
Index	3

crfdic	<i>Compare variable names between CRF and data dictionary</i>
--------	---

Description

crfdic uses CRF-derived csv file and a data dictionary excel to compare variable names of each file

Usage

```
crfdic(CRFcsv, Dictionaryxlsx, FocusCol)
```

Arguments

CRFcsv	A filename of CRF csv file, exported from PDFCRF
Dictionaryxlsx	A filename of data dictionary xlsx file
Focus	Column name of data dictionary which focuses analysis

Value

List of output data of comparison of variables between a CRF-derived csv file and a data dictionary

Examples

```
## Not run:  
crfdic(CRFcsv = "foo.csv", Dictionaryxlsx = "foo.xlsx", Focus = NULL)  
  
## End(Not run)
```
