R topics documented:

---

crfdic	*Compare variable names between CRF and data dictionary*

Description

`crfdic` uses CRF-derived csv file and a data dictionary excel to compare variable names of each file

Usage

```
crfdic(CRFcsv, Dictionaryxlsx)
```

1

Arguments

CRFcsv   A filename of CRF csv file, usually exported from PDFCRF

Dictionaryxlsx A filename of data dictionary xlsx file

Value

List of output data of comparison between CRF and data dictionary

Examples

```
## Not run:
crfdic(CRFcsv = "foo.csv", Dictionaryxlsx = "foo.xlsx")

## End(Not run)
```
